PROFICIENCIE

I completed a frontend development course where I learned HTML, CSS, JavaScript, and React. As part of my experience, I built a coffee shop website with a user-friendly design and smooth navigation. I also developed a hotel booking website that included real-time booking features. Through these projects, I improved my skills in creating responsive and interactive web pages. I learned how to optimize website performance and ensure a good user experience.

EXPERIENCE

Front End Developer

Login 360

10/2024 - 02/2025 Coimbatore, India

Login360 is a premier software training institute located in Chennai

- Coffee Shop Website** – Designed a responsive and user-friendly website for a coffee shop with an interactive UI.
- Hotel Booking Website** – Developed a hotel room booking platform with real-time reservation features.
- Technologies Used** – Built using HTML, CSS, JavaScript, and React for a smooth user experience.
- Performance & Optimization** – Ensured fast loading times and mobile responsiveness for both projects.
- Project Goal** – Focused on creating visually appealing and functional websites to enhance user engagement.
- BACKEND DEVELOPER**
- Bank Withdrawal System** – Developed a Python program that allows users to withdraw money securely while maintaining account balance records.
- Blood Donation Management** – Created a system to store donor details, blood groups, and availability, making it easy to track and manage donations.
- Shopping Cart Application** – Built a shopping cart using Python and SQLite, enabling users to add, update, and remove products dynamically.
- Technologies Used** – Implemented tkinter for the user interface and SQLite for data storage in all projects.
- Project Goal** – Focused on creating efficient, user-friendly, and functional applications for real-world use cases.
- Responsive, **Performance Optimization**.
